Data Visualization with Power BI and Tableau

Practical – VI

Roll No.:T02	Name:KHUSHI
Class:TYIT	Batch:2
Date of Assignment: 21/08/26	Date/Time of Submission: 21/08/26

6.Designing Effective and Visually Appealing Dashboards.

a)Apply worksheet-level and workbook-level formatting.

STEPS:-

- 1.Open the Tableau workbook and connect the List of Orders.csv and Order Details.csv files.
2. Create the required relationship using Order ID.
3. Open Format and select Workbook to apply workbook-level formatting.
4. Set the worksheet font, pane, header, tooltip and title formatting.
5. Format the worksheet lines by adjusting grid lines, zero lines, trend lines, reference lines and axis rulers

OUTPUT:-

The screenshot displays the Tableau interface. At the top, the 'List of Orders+' sheet is shown with a relationship between 'List of Orders.csv' and 'Order Details.csv'. The 'Format' menu is open, and 'Workbook...' is selected. The 'Format Lines' dialog is also visible, showing options for Grid Lines, Zero Lines, Trend Lines, Ref Lines, Drop Lines, Axis Rulers, and Axis Ticks. The 'Format Lines' dialog is currently set to 'None' for all line types. The 'Axis Ticks' section shows a color palette with various colors and a 'More colors...' link.

b) Customize number, date, and null value formatting.

STEPS:-

1. In the Data pane, right-click the Profit field and select Default Properties > Number Format.
2. Select Currency (Custom), set the required decimal places and display units, and enable the thousands separator.
3. Right-click Order Date and select Default Properties > Date Format.
4. Choose the required date format from the available options.
5. Check the worksheet and tooltip to ensure numbers, dates and null values are displayed consistently.

OUTPUT:-

The screenshot illustrates the process of customizing the number format for the Profit field in QlikView. The Data pane on the left shows the 'Order Details.csv' table with fields like Category, Order ID, Sub-Category, Amount, Profit, Quantity, and Order Date. The Profit field is highlighted in green. A context menu is open over the Profit field, showing 'Default Properties' > 'Number Format...'. The 'Default Number Format [Profit]' dialog box is open, showing 'Currency (Custom)' selected, with 'Decimal places' set to 2, 'Negative values' set to '₹ -1234', 'Display Units' set to 'Thousands (K)', and 'Include thousands separators' checked. The 'Order Date' field is also highlighted in blue, and its context menu is open, showing 'Default Properties' > 'Date Format...'.

c) Design effective color schemes and layouts.

STEPS:-

1. Select the measure used in the view and open its color/format options.
2. Choose a suitable color palette for the visualization.
3. Use a Red-Green Diverging palette for Profit so negative and positive values are easy to distinguish.
4. Set the center value to 0 and use stepped colors where required.
5. Keep the layout simple, aligned and consistent with the dashboard.

OUTPUT:-

d) Create informative tooltips.

STEPS:-

1. Select the worksheet and open the Marks card.
2. Add the required fields such as Order ID, Amount, Profit and Quantity to the view.
3. Open Tooltip and edit the tooltip text.
4. Add a clear heading and meaningful field values using the Insert option.
5. Format the tooltip so the key information is easy to read when the user hovers over a mark.

e) Implement “Viz in Tooltip”.

STEPS:-

1. Open the Tooltip editor for the Category Profitability worksheet.
2. Write the category overview text and insert the required measures.
3. From Insert > Sheets, select the worksheet to display inside the tooltip.
4. Set the embedded sheet size and use <All Fields> as the filter so the tooltip responds to the selected category.
5. Apply the tooltip and hover over a category to verify the embedded visualization

f) Improve readability and user experience.

STEPS:-

1. Edit the worksheet title and use a clear, descriptive heading.
2. Keep important titles and KPI values prominent and easy to scan.
3. Use consistent fonts, spacing, alignment and number formatting across the dashboard.
4. Add annotations only where they improve understanding of the visual.
5. Arrange the charts and KPI summary so the dashboard can be read from top to bottom easily.

g) Apply best practices for visual storytelling.

STEPS:-

1. Save the completed work as a Tableau Workbook (.twb).
2. Use a clear dashboard title and concise executive-summary messages.
3. Present KPIs first, followed by the category profitability and supporting visuals.
4. Use color, annotations and tooltips to highlight important business insights.
5. Keep the dashboard focused on the main story and avoid unnecessary visual elements.
